SKILLS

LANGUAGES

JavaScript (ES6), Python,
Go, GraphQL

FRAMEWORKS/LIBRARIES

React, Redux, Next.js, Express,
Apollo, Typescript, Node.js, Jest,
React Testing Library

DATABASES/PLATFORMS

PostgreSQL, MySQL,
Heroku, MongoDB,
Firebase, Strapi

EXPERIENCE

Outdoorsy | Senior Software Engineer | San Francisco, CA

April 2021 - present

- Utilized React, Next.js, Redux, Typescript, Tailwind, and Apollo GraphQL to build stable, maintainable, and mobile-responsive websites that met project requirements and exceeded user expectations.
- Collaborated closely with cross-functional teams to deliver high-quality websites, providing technical expertise and support throughout all project phases.
- Reduced technical debt by 30% within the first month through proactive bug fixing and code reviews, ensuring code quality and maintainability.
- Contributed to developing an in-house UI design system for a monorepo project, enabling consistent design language and efficient development across multiple products and platforms.

Agama Solutions | Software Engineer | San Francisco, CA

Dec 2019 - Feb 2021

- Designed, architected, and wrote the front end of MVP application and the company website from scratch using React and Redux.
- Worked closely with designers and back-end developers to execute the functionality of designs and templates.
- Rebuilt static pages with Next and headless CMS to increase the loading speed by 70%.
- Created optimized solutions across multiple devices and screens, including desktops, tablets, and smartphones.

Appstem | Software Engineer (Contract) | San Francisco, CA

Jun 2019 - Nov 2019

- Translated design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS, JavaScript, Node/Express.js, and React.js.
- Increased scalability, maintainability, and responsiveness of cross-browser code by 50%.
- Collaborated closely with the team to support projects during all delivery phases.

Groupmuse | Frontend Mobile Engineering Intern | San Francisco, CA

Aug 2018 - Oct 2018

- Developed classical concert scheduling app for iOS using React Native and Redux, enabling 100,000+ users to have mobile access.
- Built features for reserving events and subscribing by adding API calls, reducers, and thunks, connecting mobile users to the Groupmuse community and 1000+ events.
- Wrote snapshot and unit tests using Jest and Enzyme to increase test coverage by 20%.
- Implemented an automated end-to-end Detox testing framework to prepare the app for beta release.

Renewable Path | Office Manager / Web developer | San Francisco, CA

2016 - 2018

- Managed 500+ schedules, organized office functions, and supervised daily operations of the office.
- Developed new features for the company website using Javascript, jQuery, and Flexbox.
- Served as a go-to person regarding any administrative and operational related functions.

EDUCATION

- Rithm School: Full-stack web development/software engineering program 2018
- Bachelor of Science: [Computer Science](#), Minor: [Mathematics](#) at San Francisco State University 2015
