EXPERIENCE

Refer Me Job | Frontend Engineer | San Francisco, CA   Jun 2020 - Present
➢ Built stable, maintainable and mobile-responsive websites using React, Redux, Typescript, and React-Bootstrap.
➢ Collaborated closely with the team to support projects during all phases of delivery.
➢ Performed bug fixed and code reviews. Technical debt reduced by 30% within the first month.

Agama Solutions | Software Engineer | San Francisco, CA   Dec 2019 - Nov 2020
➢ Designed, architected and wrote the front-end of MVP application and the company website from scratch using React and Redux.
➢ Worked closely with designers and back end developers to execute functionality of designs and templates.
➢ Rebuilt static pages with Next and headless CMS to increase the loading speed by 70%.
➢ Created optimized solutions across multiple devices and screens, including desktops, tablets, smartphones.

Appstem | Software Engineer (Contract) | San Francisco, CA   Jun 2019 - Nov 2019
➢ Translated design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS, JavaScript, Node/Express.js, and React.js.
➢ Increased scalability, maintainability, and responsiveness of cross-browser code by 50%.
➢ Collaborated closely with the team to support projects during all phases of delivery.
➢ Provided guidance and troubleshooting support to clients.

Groupmuse | Frontend Mobile Engineering Intern | San Francisco, CA   Aug 2018 - Oct 2018
➢ Developed classical concert scheduling app for iOS using React Native and Redux, enabling 100,000+ users to have mobile access.
➢ Built features for reserving events and subscribing by adding API calls, reducers, and thunks, connecting mobile users to the Groupmuse community and 1000+ events.
➢ Wrote snapshot and unit tests using Jest and Enzyme to increase test coverage by 20%.
➢ Designed React components using Atomic Design and styled-components (with Flexbox).
➢ Implemented automated end-to-end Detox testing framework to prepare app for beta release.

Renewable Path | Office Manager / Web developer | San Francisco, CA   2016 - 2018
➢ Managed 500+ schedules, organized office functions, and supervised daily operations of the office.
➢ Developed new features for the company website by using Javascript, jQuery, and Flexbox.
➢ Served as go-to-person regarding any administrative and operational related functions.
